**Contact your Hitachi dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.

### Control Owning and Operating Costs

Customer Personal Service (CPS) is part of Hitachi’s proactive, fixed-time, before-fail strategy on machine maintenance that will help control costs, increase profits, and reduce stress. Included in this comprehensive line of ongoing programs and services are:

- Fluid analysis program
- Machine Information Center (MIC)
- Preventive Maintenance (PM) agreements
- Remote monitoring / Service agreements
- Scheduled maintenance

Component life-cycle data – gives vital information on the projected life span of components and lets you make informed decisions on machine maintenance by telling you approximately how many hours of use you can expect from an engine, transmission, or hydraulic pump. This information can be used to preempt catastrophic downtime by servicing major components at about 80 percent of their life cycle.

Preventive Maintenance (PM) agreements – give you a fixed cost for maintaining a machine for a given period of time. They also help you avoid downtime by ensuring that critical maintenance work gets done right and on schedule. On-site preventive maintenance service performed where and when you need it helps protect you from the expense of catastrophic failures and lets you avoid waste-disposal hassles.

Extended coverage – gives you a fixed cost for machine repairs for a given period of time so you can effectively manage costs. Whether you work in a severe-service setting or just want to spread the risk of doing business, this is a great way to custom-fit coverage for your operation.

And an extended coverage contract also travels well because it’s backed by Hitachi and is honored by all Hitachi construction dealers.

Customer Support Advisors (CSA) – Hitachi believes the CSA program lends a personal touch to Customer Personal Service (CPS). Certified CSAs have the knowledge and skills for helping make important decisions on machine maintenance and repair. Their mission is to help you implement a plan that’s right for your business and take the burden of machine maintenance off your shoulders.
