At Hitachi, we don’t get sidetracked building every kind of construction equipment. Instead, we build excavators. It’s that kind of engineering and manufacturing focus that results in our reputation for highly efficient, reliable and durable machines.

Small and compact, the ZX35U-5, ZX50U-5 and ZX60USB-5 give you big-time performance on all kinds of jobs. You get a more spacious cab with wider, easier entry and better visibility; a fuel-efficient and reliable engine that meets emission standards; and maintenance that’s easier than ever thanks to enhancements such as improved access to coolers. Add it all up, when you choose Hitachi Dash-5 Compact Excavators, you get...
Yanmar diesel engines meet EPA Final Tier 4 (FT4)/EU Stage IV emissions regulations. Easy-to-maintain, they require no special, additional fluids – just ultra-low-sulfur diesel fuel and CJ-4 engine oil.

Updated door design provides improved visibility and more room for entering the cab – a key operator-requested improvement over the previous models.

An additional service door provides convenient cooler access, making core clean-out quicker and easier.
MORE PRODUCTIVITY IN MORE PLACES.

A SIZEABLE IMPACT ON PRODUCTIVITY.

No doubt about it. With their reduced- and zero-tail-swing designs, these compact, yet powerful excavators are perfect for work in congested or confined areas. But they’re not just close-quarters contributors. Easy to load and transport between jobs, these models are also smart choices for trenching, excavating, loading trucks and other tasks in wide-open spaces. Fuel-efficient, direct-injected Yanmar engines are FT4-certified and are impressively quiet – so you can run them almost anywhere, anytime. When you’ve got these compact excavators on your team, you can...

WORK EVERYWHERE, EVERY DAY.

- Although not a replacement for a grading tractor, standard backfill blades let these excavators fill in quite capably. An optional all-hydraulic blade angles 25 degrees, left or right, for even more efficient grading and backfilling.

- Choose the tracks that are best for the way you work. The rubber tracks traverse virtually any terrain, including paved surfaces. Also available are steel tracks and steel tracks with rubber pads. The optional rubber grousers combine work-anywhere flexibility with steel-track serviceability.

- Don’t let obstacles get in the way of your work. The independent-swing boom and 360-degree rotation let you set up and work nearly anywhere.

- Visibility that’s practically unlimited, precise feel and smooth, accurate control make Dash-5 compacts a great fit for excavating in and around existing utilities.
Match engine speed to the job with power/economy work modes. Choose the power mode and get higher engine speeds for most general digging work. For lighter digging jobs, the economy mode reduces engine speed and noise, and lowers fuel costs.

When the going gets tough, the powerful Yanmar diesel engines give you high-level torque for more pull-through power.

With plenty of lift height and reach, getting up and over truck sideboards is all in a day’s work.

Standard quick-coupler equipped, boom-mounted auxiliary hydraulic lines make attachment hook-up a snap.

Wedge-style coupler enables quick changes and a wide variety of buckets and attachments, such as breakers and augers.
Spacious operator stations have wide entryways, making entry and exit easier than ever. Flat, skid-resistant floor mats remove easily for clean-out.

Redesigned cab’s 50-mm (2-in.) wider, 150-mm (6-in.) taller front glass; and single-hinge door provide unsurpassed all-around visibility.

Swing boom and foldable travel pedals are positioned where they’re easy to operate, yet allow plenty of foot room.

Noise-reducing muffler (ZX35U-5) and after-treatment device (ZX50U-5/ZX60USB-5), plus isochronous high-idle speed, help keep things noticeably quiet. Rubber cab mounts further isolate the operator from noise and vibration to help reduce fatigue.

Auto-idle automatically reduces engine speed when hydraulics aren’t in use. Auto-shutdown further preserves every precious drop of fuel.

No operator activation required for high-speed travel. Track speeds automatically slow to low whenever the travel motors encounter a heavier load. Includes a console-mounted, low-speed lock switch.

Convenient 12-volt port powers cell phones and other electronic devices. There’s also a large cup holder and seat back compartment for documents.
THE PERFECT FIT
FOR OPERATOR COMFORT
AND PRODUCTIVITY.

A BIGGER, BETTER COMFORT ZONE.

Good news. Your operators won’t have to squeeze their way aboard our excavators. Our comfortable work stations are spacious, with wide entryways to ease entry and exit. Seat, pedals and controls are positioned to accommodate bigger operators. And virtually unobstructed visibility provides a clear view of the work ahead and surrounding jobsite. For year-round comfort and increased productivity, add a heated and air-conditioned cab. Step aboard a Hitachi compact excavator, and you’ll experience...

MORE COMFORT, MORE PRODUCTIVE DAYS.

- Enhanced monitor provides vital operating info at a glance and fingertip control of several functions, including auto-shutdown, power/economy modes and auto exhaust filter cleaning. Plus, two trip meters let you track engine oil and hydraulic oil changes, or jobsite hours.
- Go from backhoe- to excavator-style controls with just a twist of your wrist. Control-pattern selector valve is conveniently located in a compartment beneath the seat.
- Ergonomic short-throw pilot control levers provide smooth, predictable low-effort fingertip operation.
- Automatic, high-velocity bi-level climate-control system with automotive-style adjustable louvers help keep the glass clear and the cab comfortable.
DURABILITY

- O-ring face-seal hydraulic fittings virtually eliminate aggravating and costly oil leaks.
- Rigid, reinforced D-channel side frames resist impact, providing maximum cab and component protection.
- Self-priming diesel helps you get back up and running quickly should you ever run out of fuel.
- Oil-impregnated bushings enhance durability and extend grease intervals to 500 hours for the arm-and-boom joint, and 100 hours for the bucket.
- To help prevent accidental machine movement, a spring-applied, hydraulically released park brake automatically engages when a control lever is released.
- Wet-disc swing brake provides long-term maintenance-free performance.
Our compacts are smaller, but they’re no less durable. Built to the same high standards as our larger excavators, they’re armed with exactly what you need. Oil-impregnated boom, arm and bucket bushings increase digging structure durability. Reinforced D-channel side frames protect components from impact damage. And heavy-duty cast or box-constructed fabricated X-frames provide a rock-solid base. The closer you look at Dash-5 compacts, the more you’ll see...

DURABILITY THAT INCREASES YOUR ABILITY.

- Single-pin swing-post increases boom stiffness, enhancing the structural integrity of the digging components. Wear-resistant hoses are routed for protection and Cordura®-wrapped where exposed.
- Heavy-duty shields deflect material and impacts, protecting the boom/blade cylinders and drive motors.
- Rubber tracks’ unique steel cores resist cracking. Large-diameter drive sprockets and track idlers further increase undercarriage durability.
- Heavy-duty X-frame provides a solid, stable platform that resists material and dirt build-up.
If there’s a way to increase uptime, reduce your daily operating costs and simplify maintenance, we’ve implemented it in the Dash-5 Series. Extended hydraulic and engine oil change intervals reduce downtime and expense. Daily checks are done through a steel rear door that slides up and out of the way. The operator station tilts forward, providing quick, wide-open component access. And of course, industry leading parts and service are just as easily accessible at all Hitachi dealers. Put these excavators to work and expect ...

HARD WORK MADE EASIER AND LESS COSTLY.

EFFICIENCY ON EVERY JOB, EVERY DAY.

- Vertical spin-on filters allow quick and clean changes. Extended engine and hydraulic oil intervals let you work longer.
- Hinged door provides wide-open access to the side-by-side oil cooler and radiator for easier core cleanout.
- Operator station tilts forward 50 degrees, simplifying access to the swing motor, hydraulic control valve, engine starter motor and alternator.
- Routine checks such as engine oil level are quickly accomplished from ground level. Convenient lube/maintenance chart helps ensure that nothing gets overlooked.

SMOOTHER EFFICIENCY IN A ROUGH WORLD.
Hydraulic fluid sight gauge and see-through coolant reservoir let you quickly check levels at a glance.

A simple grease gun and a wrench are all it takes to quickly maintain proper track tension.

Large fuel tanks and 500- and 2,000-hour engine and hydraulic oil-service, and 500-hour greasing intervals enable these excavators to work longer between stops for scheduled service.

EPA Final Tier 4 (FT4)/EU Stage IV technology in our excavators is simple, fuel-efficient, fully integrated and fully supported. In the ZX50U-5 and ZX60USB-5, it employs field-proven cooled exhaust gas recirculation (EGR) for reducing NO\textsubscript{x} and a diesel particulate filter (DPF) and diesel oxidation catalyst (DOC) to reduce particulate matter. The ZX35U-5 does not require an after-treatment system to meet EPA requirements.

Seamless diesel particulate filter (DPF) cleaning happens automatically without impacting machine productivity. The service interval is 6,000 hours and can be done by your Hitachi dealer.

Fuel-sipping diesels, auto-idle and economy work mode help preserve precious fuel.
### Engine
- **Manufacturer and Model**: Yanmar 3TNV88F
- **Non-Road Emission Standard**: EPA Final Tier 4/EU Stage IV
- **Displacement**: 1,642L (100.2 cu. in.)
- **Net Power (ISO 9249)**: 17.4 kW (23.3 hp) @ 2,400 rpm

### Powertrain
- Each track independently driven by hydrostatic axial-piston motor connected to 2-stage planetary gear-reduction box

### Maximum Travel Speed
| Low | 2.8 km/h (1.7 mph) |
| High | 4.3 km/h (2.7 mph) |

### Hydraulics
- Open center with 2 variable-displacement pumps and 1 fixed-gear pump
- **Pump Flow**
  - **Piston**: 2 x 38.4 L/m (2 x 10.1 gpm)
  - **Gear**: 22.8 L/m (6.0 gpm)
- **Auxiliary Flow**: 61.2 L/m (16.2 gpm)
- **Controls**: 2 hydraulic pilot-operated controls for boom, arm, bucket, swing, boom swing, travel and auxiliary functions

### Electrical
- **Alternator Rating**: 55 amp
- **Working Lights**: 2 halogen: 1 mounted on operator’s station and 1 mounted on boom

### Undercarriage
- **Track, Rubber**: 300 mm (12 in.)
- **Ground Pressure**
  - **With Rubber Track**: 32.0 kPa (4.6 psi)
  - **With Rubber Track**: 33.0 kPa (4.8 psi)
  - **With Rubber Track**: 33.7 kPa (4.9 psi)
  - **With Rubber Track**: 35.2 kPa (5.1 psi)

### Swing Speed
- **9.0 rpm**

### Independent Swing Boom
| Left | 72 deg. |
| Right | 62 deg. |

### Swing Brake
- Spring-applied, hydraulically released, automatic, disc type

### Serviceability

| Refill Capacities | Fuel Tank | 42 L (11.1 gal.) |
| Cool System | 5.0 L (5.3 qt.) |
| Engine Oil with Filter | 7.2 L (7.6 qt.) |
| Hydraulic Tank | 32 L (8.5 gal.) |

### Operating Weights
- **With Full Fuel Tank and 79-kg (175 lb.) Operator**
  - **Standard Arm, Canopy and Standard Counterweight**: 3,520 kg (7,760 lb.)
  - **Standard Arm, Canopy and Standard Counterweight**: 3,690 kg (8,135 lb.)
  - **Long Arm, Canopy and Extra Counterweight**: 3,783 kg (8,340 lb.)
  - **Long Arm, Canopy and Extra Counterweight**: 3,953 kg (8,715 lb.)

| Optional Angle Blade | Standard: 296 kg (653 lb.) |
| Counterweight | Standard: 540 kg (1,190 lb.) |
| Additional: 240 kg (529 lb.) |

*Blade down (limited by hydraulics).*
**ADDITIONAL EQUIPMENT**

**Key:**  ● Standard  ▲ Optional or special

### 35 50 60 Engine
- Meets EPA Final Tier 4/EU Stage IV emissions
- Engine coolant to <37 deg. C (~34 deg. F)
- Engine preheater
- Fan guard
- Fuel/water separator
- Full-flow oil filter
- Isolation mounted
- Key start switch with electric fuel shutoff
- Single dry-type air filter

### Hydraulic System
- Auxiliary function right-hand pilot lever control
- Auxiliary hydraulic lines with quick couplers to end of boom
- Auxiliary return-flow selector valve
- Axial piston swing motor
- Boom-swing foot control
- Excavator-to-backhoe control pattern change valve
- Open center with 2 variable-displacement pumps and 1 fixed-gear pump
- Closed center load-sensing with 1 variable-displacement pump
- Hydraulic pilot-operated controls for boom, arm, bucket, swing, boom swing, blade, travel and auxiliary functions
- Wet-disc swing brake

### Undercarriage
- Planetary final drive
- Propel motor shield
- 2-speed axial-piston propel motors
- Rubber track, 300 mm (12 in.)
- Rubber track, 400 mm (16 in.)
  - Steel track, 400 mm (16 in.) with triple semi-grousers
  - Steel track, 400 mm (16 in.) with triple semi-grousers
  - Rubber crawler pad, 300 mm (12 in.)
  - Rubber crawler pad, 400 mm (16 in.)

### 35 50 60 Upperstructure
- 360-deg. rotation
- Counterweight, 540 kg (.190 lb.)
- Counterweight, 700 kg (.154 lb.)
- Counterweight, 745 kg (.1642 lb.)
- Hinged service-access doors
- Toolbox
- ROPS/TOPS/FOPS canopy
- ROPS/TOPS/FOPS (cab) with air conditioning and heater
- Vandal protection for service doors, fuel cap and toolbox
- Zero-tail-swing configuration
- Reduced-tail-swing configuration

### Front Attachments
- Arm, 1315 mm (4 ft. 4 in.)
- Arm, 1350 mm (4 ft. 6 in.)
- Arm, 1660 mm (4 ft. 8 in.)
  - Long arm, 1650 mm (4 ft. 7.1 in.), includes additional 250-kg (551 lb.) counterweight
  - Long arm, 1715 mm (5 ft. 7 in.), includes additional 240-kg (535 lb.) counterweight
  - Long arm, 1890 mm (6 ft. 1 in.), includes additional 270-kg (595 lb.) counterweight
- Articulation hose shield
- Backfill blade, 1.74 m (5 ft. 9 in.)
- Backfill blade, 2.00 m (6 ft. 7 in.)
- Hydraulic angle backfill blade
- Boom, 2.465 mm (8 ft. 1 in.)
- Boom, 2.85 mm (9 ft. 4 in.)
- Mechanical quick-coupler
- Augers: Planetary / Chain drive / Bits / Bit adapters
  - Clamp
  - Hammers: Points / Tools
  - Quick-coupler buckets: Bucket teeth / Ditching / Heavy-duty

### 35 50 60 Operator’s Station
- Horn
- Hour meter
- Instrumentation lights
- Monitor system: Preheat indicator / Engine-oil-pressure indicator with alarm / Alternator voltage indicator / Fuel gauge and low-fuel-level indicator / Engine-coolant-temperature gauge and engine coolant temperature indicator with alarm / Hour meter / Work lights indicator
- Motion alarm with cancel switch
- Work lights switch
- Propel levers and foldable pedals
- 2 travel speeds with automatic shifting
- Seat belt, 51 mm (2 in.), retractable
- Seat belt, 76 mm (3 in.), retractable
- Vinyl seat with fore/aft adjustment
- Suspension seat (cloth)
- Front screen
- Rear secondary exit kit

### Electrical
- 12-volt accessory outlet
- Alternator, 55 amp
- Low-maintenance battery
- Blade-type multi-fused circuits
- Positive-terminal battery covers
- ZXLink™ wireless communication system
  (available in specific countries; see your dealer for details)

### Lights
- Work lights: Halogen / 1 mounted on operator’s station / 1 mounted on boom

---

Net engine power is with standard equipment including air cleaner, exhaust system, alternator and cooling fan at test conditions per ISO 8249. These machines are not equipped with spark-arrestor mufflers. Usage in forestry applications is not recommended. Specifications and designs subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with standard arms, full fuel tanks and 79 kg (175 lb.) operators; a ZX35U-5 canopy unit with 610-mm (24 in.), 0.16-m³ (.57 cu. ft.) bucket, 300-mm (12 in.) rubber track and 540 kg (1,190 lb.) counterweight; a ZX50U-5 canopy unit with 610-mm (24 in.), 0.18-m³ (.68 cu. ft.) bucket, 400-mm (16 in.) rubber track and 700-kg (1,543 lb.) counterweight; a ZX60USB-5 cab unit with 0.19-m³ (6.8 cu. ft.) bucket, 400-mm (16 in.) rubber track and 745-kg (1,642 lb.) counterweight.

See your Hitachi dealer for further information.
